

Merging business principles with accounting rules

Acknowledge Web-Based Accounting takes business accounting where you need it — accessible from anywhere in the world!

The facility to access your financials from anywhere in the world is fast becoming a significant feature in the era of communication in the global village. 21st-century companies are taking the next step in the technology revolution by enabling many key business processes to be conducted via mobile devices, such as laptops, WAP-enabled phones and personal digital assistants (PDAs).

HOW TO GET THAT 'EDGE'!

In this era of continuous pursuit of new and innovative ways to create differentiation, one of the best ways to accomplish an 'edge' is through speed and accessibility of your financial data. The only way to maintain an 'edge' is to access your financial data quickly. Acknowledge Web-Based Accounting meets these requirements.

TRUE FUNCTIONALITY

Acknowledge is a web-based (not just web-enabled) accounting suite for small to

medium-sized companies, enabling online accounting and giving the company's accountants instant access to customers' books.

FEATURES

- Unlimited transactions, unlimited financial years, true job costing and multi-level authorisation processes

- Supports six language choices including English, Afrikaans, Zulu, Xhosa, French and Portuguese
- Acknowledge is supplied via experienced dealer network that sells, supports and trains end-users

The Acknowledge Accounting Suite consists of general ledger, debtors, creditors, inventory,

job costing, multi-warehousing, bill of materials, serial number tracking, multicurrency and mini-CRM.

COMBINED STRENGTHS

Web Accounting Solutions has partnered up with leaders in their fields — world-class developers and database specialists.

Acknowledge is based on the Caché post-relational database from InterSystems. Caché's unique database technology offers three integrated data access options: a robust object database, high-performance SQL and rich multi-dimensional access. Caché enables rapid web application development, extraordinary transaction processing speed, massive scalability and real-time queries

Web-based accounting

against transactional data — with minimal maintenance requirements.

Acknowledge will run on computers with low hardware specs, with workstations requiring only Internet Explorer 5.5 and above.
